

Summer holiday closure

Our offices and workshop will remain closed from 10 to 21 August, both included. Activity resumes on 24 August on a partial basis and full service is restored on 31 August.

PAPIK Group's offices and workshop will remain closed for the summer holidays from today, 10 August, until 21 August, both included. On Monday 24 August activity resumes on a partial basis, without in-person or telephone attention, and is dedicated to preparing the ordinary return. Full service will be restored on Monday 31 August, with the organisation fully operational.

During this period, administrative, commercial and production tasks are suspended, as is our usual presence on site. Enquiries reaching us until then will be logged and answered in order of arrival from 31 August, with a commitment to respond during the first days of ordinary activity.

Prior to the closure, every project under way has been secured: work areas protected, materials stored and progress reports signed off with the site management teams and the owners. The schedules agreed for the last quarter of the year are not affected by this break, which has been part of the planned calendar since the start of the financial year.

We thank our clients for their trust, our technical teams for their commitment and our contractors and suppliers for their collaboration during a particularly intense first half of the year. Sustainable construction moves forward thanks to the sustained work of many people, and these weeks of rest are part of that same effort.

On 31 August we resume ordinary activity with the autumn agenda already in motion and with new projects that we will share over the coming months. Until then, we wish you a good summer.
